DigitalCrafts | Web Development Bootcamp | Remote | August 2022-November 2022
Leadership Team Development | Quarterly Leadership Conferences | Various Locations | September 2019-Present
United States Naval Academy | B.S. Systems Engineering | Annapolis, MD | June 2012-May 2016

SKILLS

React, Redux, Node.js, HTML, CSS, JavaScript, Python, SQL, PostgreSQL, Express, Sequelize, APIs, Postman, Bootstrap, W3.CSS, Git, GitHub, Visual Studio Code, Agile Software Development

RECENT PROJECTS

Game Giver | **React Developer** | **Remote** | **November 2022**
• **Website**: gamegiver.netlify.app | **GitHub repository**: github.com/jorgerodriguez860/game-giver
• React project: Personal assistant in choosing the most relevant video games to gift to friends
• The entire project was done independently, including: Design, features, API research and implementation, React app setup, navigation routing, defining and changing global state with Redux, deployment
• Lessons learned: Identify upfront if API will have CORS issues; during development, API will be called twice, even if it is inside useEffect hook
• Tech stack: React, Redux, Third-party API, React Bootstrap

Supernova Cantina | **Full-Stack Developer** | **Remote** | **October 2022**
• **Website**: supernova-cantina.herokuapp.com | **GitHub repository**: github.com/jordanboardman/cantina
• Full-stack project: Science fiction-themed business simulation inspired by the classic lemonade stand computer game
• Role in team of 3: Back-end infrastructure setup, button functionality, page structure and styling, and data rendering
• Lessons learned: Do not declare user variable globally; multiple users should test website before release, preferably at the same time to test unforeseen issues
• Tech stack: HTML, CSS, JavaScript, Node.js, EJS, Express, SQL, PostgreSQL, Sequelize

Simply Foods | **Project Lead / Front-End Developer** | **Remote** | **September 2022**
• **Website**: simplyfoods.netlify.app | **GitHub repository**: github.com/jorgerodriguez860/food-app
• Front-end project: Helps users decide what to cook using recommendations from recipe APIs
• Role in team of 3: Project lead, API research and implementation, page structure and styling
• Lessons learned: Third-party API usage is constrained by call limits and throttled calls over a period of time
• Tech stack: HTML, CSS, JavaScript, Bootstrap, jQuery UI, Third-party APIs

PROFESSIONAL EXPERIENCE

United States Marine Corps | **Operations Officer** | **Richmond, VA** | **June 2019-July 2022**
• Received #1 operations section award out of 8 recruiting districts based in Michigan, Ohio, West Virginia, Kentucky, Tennessee, North Carolina, Virginia, and Maryland
• Informed senior level decisions with data insights to improve district recruiting performance in Virginia and parts of West Virginia, Tennessee, and North Carolina
• Managed daily recruitment, supervising 15 personnel

United States Marine Corps | **Supervisor / Coordinator** | **Camp Lejeune, NC** | **June 2017-June 2019**
• Trained and coached over 20 personnel on capabilities, limitations, and employment of multiple weapons technologies
• Supervised the maintenance and accountability of logistical support equipment worth over $200,000, improving operational readiness
• Led task group including U.S. and European partners to improve infantry performance using multiple weapons technologies
• Coordinated administrative requirements and logistical support between agencies to send U.S. personnel to train African partners in infantry tactics
